FOUNDATION SYSTEM // STATIC DETECTION

FOUNDATION SYSTEM // STATIC DETECTION

Track recurring distractions for 7 days. Observe where attention fragments.

Static Sources	Signal Builders
Notifications	Sleep
Noise	Movement
Fragmented routine	Focus blocks
Overload	Recovery windows

ATTENTION ARCHITECTURE

Protect environments where focused work happens.

RECOVERY MAP

Sleep. Movement. Focus. Recovery.

BUILDER LAYER

Notice. Filter. Protect. Recover.

TRANSMISSION // PARTIAL RECOVERY

STATIC DETECTED
SIGNAL FRAGMENTING
RECOVERY ACTIVE
ELEVATION ENGINE PENDING

CONSTELLATION LAYER

Protected attention creates stronger capability systems.

SIGNAL ANOMALY

Repeated distractions reveal architecture failures.

Signal Fragment: 01000101 01001100 01000101 01010110 01000001 01010100 01001001 01001111 01001110

HORIZON LAYER

Builders protect signal before expansion.

FIELD LOGS

RECOVERY LOG 1

Static source:

Signal builder:

Focus score ____ /10

RECOVERY LOG 2

Static source:

Signal builder:

Focus score ____ /10

RECOVERY LOG 3

Static source:

Signal builder:

Focus score ____ /10

RECOVERY LOG 4

Static source:

Signal builder:

Focus score ____ /10

RECOVERY LOG 5

Static source:

Signal builder:

Focus score ____ /10

RECOVERY LOG 6

Static source:

Signal builder:

Focus score ____ /10

RECOVERY LOG 7

Static source:

Signal builder:

Focus score ____ /10

RECOVERED FRAGMENT

Capability fails quietly when attention fragments.
